Modern Workforce Management
Business Case for the Public Sector

The Power of the Modern Workforce

Each public sector organization faces daily complex workforce challenges. But economic disruptions and shifting worker expectations have given rise to new concerns, such as competition with the private sector for talent or labor shortages that impact the ability to deliver essential services. Workforce management technology can help public institutions meet regulatory obligations and maintain high service standards while streamlining operations, attracting talent, and creating a resilient workforce that adapts to evolving citizen demands.

How Are You Reimagining Your Public Sector Operations When Faced with These Common Industry Trends?

Navigating Complex Regulatory and Compliance Mandates

Public institutions are highly regulated environments with complex union rules, labor laws, legal standards, and protocols that vary by department—this increases compliance risks, especially when rules are monitored manually. By 2026, 60% of government organizations will prioritize business process automation.¹

Demographic Shifts and Succession Planning

Government workforces are changing fast. 35% of eligible employees are accelerating retirement plans, and 53% of government entities expect the largest wave of retirement in the next few years.² Attracting younger workers will require more than far-off retirement benefits.

Heightened Employee Expectations and Reskilling Initiatives

Employees expect their work to support their well-being and professional growth. Meanwhile, public organizations need skilled workers—70% report fewer qualified applicants than their total number of open positions.² The public sector needs tools that can reskill talent while providing better work experiences.

Modernizing Technology to Meet Citizen Demands

Public entities must recognize the need for modern technology as citizens and employees push for user-friendly interfaces and feedback-driven improvements for better service delivery. Over 60% of CIOs from state and local levels plan to invest in modernizing applications, and 62% in cloud platforms.³

“

Governments are redesigning the public sector workforce to become more flexible, skills based, and collaborative. ”

— Deloitte, *Government Trends 2023*

Make the Case for Change

This Value Accelerator has been developed for public institutions and agencies who are building a business case for purchasing a modern workforce management solution. See what customers and analysts are saying about the value WorkForce Software brings—and review data-driven results from public sector customers—to help make your decision to invest in our modern workforce management solution the clear choice.

An Urgent Call to Action for Employers to Improve Employee Experience

As public sector employers navigate seismic shifts in workforce demographics and growing employee expectations, it is imperative that you evaluate how you can better meet the overlooked needs of deskless shift-based workers. Attracting new talent and retaining current employees requires workforce management tools and practices that support better work experiences while adapting to the diverse and complex nature of public sector requirements.

The **Third Annual Global Employee Experience Study** provides an analysis of perceptions on the importance of employee experience aspects resulting from surveying employees and managers, including a focus on hourly shift workers.

Over the last three years, our study findings have shown increasing alignment in perception by employers and employees of the ability to deliver capabilities that create a good employee experience.

Since our first report in 2021, our results also indicate significant growth in the importance of these elements for employees, who now view better experience as fundamental. For instance, the overall percentage of employees who recognize the importance of flexible scheduling has increased by twenty-five points. The only experience aspect that saw a point decrease was the percentage of employees who feel their employer recognizes their contributions. Though the change may seem nominal, it indicates the need for stronger organizational efforts to establish dedicated channels for recognizing employee achievements.

This is an urgent call to action for employers to make investments that improve these agreed upon experience challenges, or risk watching employees leave for companies who will. For organizations, responding to issues that matter to their employees holds significant value—often in the form of tangible business cost benefits, including improved retention, productivity, and greater customer satisfaction.

Now that employers recognize the importance of employee experience, it is imperative that organizations meet employee needs with actions that address the underlying problems contributing to their dissatisfaction. Those who wait will miss the opportunity to make better experience a differentiator.

Prefers Easy Access to Training and Information

Wants Employer Who Offers Scheduling Flexibility

Feels Employer Recognizes Contributions

Prefers Easy Communication and Collaboration

Would Choose Employer Who Asks for Regular Feedback

WorkForce Software is a pioneer in our industry as the first global provider of modern workforce management solutions with integrated employee communications. We've made an investment in smart communication tools that are designed to leverage data, adapt, and communicate quickly with the ease of use of a favorite personal app.

The Next Generation of Public Workforce Management

WorkForce Software improves your employee experience and operational performance and supports regulatory compliance. We understand your departments have varying needs, and we'll work to support and automate even the most complex rules for pay, absence, attendance, CBA requirements, and scheduling.

Perform with Greater Agility

- Minimize errors, prevent payroll leaks, and eliminate repetitive tasks with automated time, attendance, absence, leave, and gross pay processing.
- Serve relevant data to employees and supervisors as needed, in real time, as work, overtime, absence, scheduling, or time issues arise. Common examples include work-order processing, servicing grants, alert responses, and ensuring final data for processing payroll is complete and accurate.
- Refine labor utilization with critical KPIs, optimal labor scheduling, and intra-day labor reallocation as needed.
- Optimize labor costs with proactive alerts when actual work doesn't align with planned work.
- Communicate with staff as situations arise with group announcements and broadcasts. Alerts can be sent for emergency situations, natural disasters, events, weather patterns, and any reason as necessary.

Win and Keep Top Talent

- Enable real-time workforce communication and collaboration through a familiar, easy-to-use app—share best practices, ask for help, and celebrate successes.
- Train workers in new skills, re-train employees that need further knowledge, and up-skill workers with micro training delivered at the time work happens.
- Provide access to integrated documents for policies, regulations, instructions, manuals, protocols, and task lists.
- Give employees control over work/life balance with easy access to schedules and self-service features to view vacation, PTO, etc.; request time off; swap shifts; and provide availability.
- Provide real-time visibility into gross pay and hours with automated alerts for issues impacting an employee's pay—before payroll is processed.
- Act on employee sentiment using poll survey responses for topics like unplanned overtime and extended work hours.

Reduce Compliance Risks

- Mitigate the risk of litigation, fines, penalties, and breaches—comply with union and collective bargaining agreements, as well as national, regional, and local legislation.
- Schedule the right employee per municipal and union requirements while adhering to local, state, and federal laws—considering employee preferences and factors like locations, skills, certifications, and seniority.
- Automatically backfill one or multiple absent employees at once with a few simple clicks, selecting replacement staff with required skill sets, adhering to CBA requirements, and—when possible—using the lowest-paid employees first to control labor costs.

Public Sector Organizations Realize Significant Benefits with WorkForce Software

There are a range of benefits and savings our public sector customers realize with WorkForce Software solutions. These estimates are based on the aggregated results of value studies with our existing public sector customers across a range of deployments and organizational maturities.

Customer Sample Benefit Ranges

(Conservative—Likely)

WorkForce Software Capabilities	5K Employees Benefits	50K Employees Benefits	100K Employees Benefits
Time & Attendance	\$3.2M – \$5.3M	\$31.8M – \$52.9M	\$63.7M – \$105.9M
Scheduling & Forecasting	\$1.6M – \$3.1M	\$16.2M – \$30.7M	\$32.5M – \$61.5M
Task Management	\$594K – \$743K	\$5.9M – \$7.4M	\$11.9M – \$14.9M
Absence & Leave Management	\$36K – \$72K	\$361K – \$723K	\$723K – \$1.4M
Employee Experience	\$2.5M – \$4.3M	\$24.6M – \$42.6M	\$49.3M – \$85.2M
Total Benefits	Up to \$13.4M	Up to \$134.4M	Up to \$268.9M

Sample benefit calculations only. Your actual return on investment will depend on your current processes, implementation details, and post-implementation state.

WorkForce Software Business Case Value Drivers

We understand that your organization is unique. Each public sector entity, and often each department within an organization, bears a unique set of detailed requirements. WorkForce Software's Customer Value Experts are dedicated to partnering with you to make a compelling case for change that appeals to the stakeholders of your organization.

Value Drivers	SAMPLE BENEFIT RANGE (Conservative— Likely)					
	5,000 Employees	50,000 Employees	100,000 Employees	5,000 Employees	50,000 Employees	100,000 Employees
TIME & ATTENDANCE						
Payroll Savings with Improved Accuracy and Automation	\$970K	\$1.9M	\$9.7M	\$19.3M	\$19.4M	\$38.5M
Labor Cost Savings with Reduced Time Inflation	\$524K	\$1.0M	\$5.2M	\$10.5M	\$10.5M	\$20.9M
Reduced Unearned PTO Expense with Automation	\$335K	\$680K	\$3.4M	\$6.8M	\$6.7M	\$13.6M
Overtime Cost Savings with Improved Overtime Visibility	\$196K	\$388K	\$2.0M	\$3.9M	\$3.9M	\$7.8M
Manager Turnover Reductions with WFS Assistant	\$25K	\$50K	\$250K	\$500K	\$500K	\$1.0M
Reduced Legacy System Costs	\$137K	\$141K	\$1.4M	\$1.4M	\$2.7M	\$2.8M
Timekeeping, Data Processing Efficiencies with Automation	\$824K	\$841K	\$8.2M	\$8.4M	\$16.5M	\$16.8M
Retroactive Adjustments and Pay Correction Efficiencies	\$18K	\$31K	\$182K	\$309K	\$364K	\$619K
Employee Self-Service and Automation of Time-Off Requests	\$154K	\$189K	\$1.5M	\$1.9M	\$3.1M	\$3.8M
	\$3.2M	\$5.3M	\$31.8M	\$52.9M	\$63.7M	\$105.9M
SCHEDULING & FORECASTING						
Labor Cost Savings with Reduced Over-Scheduling	\$1.4M	\$2.8M	\$14.2M	\$28.4M	\$28.3M	\$56.7M
Scheduling Automation Efficiencies	\$209K	\$237K	\$2.1M	\$2.4M	\$4.2M	\$4.7M
	\$1.6M	\$3.1M	\$16.2M	\$30.7M	\$32.5M	\$61.5M

Getting Cross-Departmental Collaboration and Buy-In When Building Your Business Case

It's in each department's best interest—whether it's human resources, finance, operations, or IT—to collaborate and create a shared vision of the benefits of evolving your workforce management practices (and using technology to facilitate it).

Here's what each team brings to the table and why they should be part of the process:

Human Resources

As the public sector navigates consequences of high turnover (due to retirements, competition for tech-savvy talent, and concerns about safety and work/life balance), HR teams are focused on creating positive employee experiences to boost engagement, productivity, and loyalty. This includes ensuring a safe work environment, adhering to labor laws and leave policies, fulfilling contractual obligations, offering flexible scheduling, and providing opportunities for skill development and career growth.

HR can drive these initiatives by assessing specific workforce management needs, evaluating the potential consolidation of current HR systems, and incorporating employee feedback into proposed solutions.

Finance

Investing in modern workforce management yields the highest ROI among human capital initiatives. CFOs and finance teams confirm quantifiable cost savings across financial, operational, and risk metrics. ROI, backed by KPIs like labor cost optimization, reduced turnover, and preventing non-compliance costs helps garner support for workforce management technology investments.

Efficient time tracking streamlines payroll processes, avoiding the need for manual overrides, saving time and money on labor costs. These savings often fund HR digital transformations and aid finance teams in effective budgeting.

Operations

The role of operations leadership is crucial to ensure productivity and engagement amid growing demand for streamlined performance and the need to deliver essential services with a limited workforce. They play a key role in standardizing processes to optimize labor utilization and satisfaction. Achieving this requires that the workforce be informed, listened to, and motivated daily.

Operations identifies pain points and shares specific department knowledge to help build accurate processes within the system that support efficient workflows. These configurations use digital assistants to automate tasks where possible. By tailoring configurations, the system can then support the preferred work styles of a multigenerational workforce.

Information Technology

The IT department will be a valuable partner in ensuring the successful implementation of technology solutions. They can partner with other departments to align technology with organizational goals, ensure compliance with security standards, and monitor the adoption and performance of new technology.

The IT department can also provide expertise in evaluating and selecting technology solutions to determine if they are the right fit for the current or planned infrastructure and requirements, including support plans and processes, integration capabilities, and ongoing maintenance efforts.

WorkForce Software Solutions Equips the Public Sector to Better Serve Their Communities

WorkForce Software is the modern workforce management choice for public sector organizations, aligning with your mission to deliver high-quality services to your community, starting with your employees. Our solution's capabilities enable your organization to effectively navigate complex regulatory changes, labor shortages, and efficient cost control with digital employee management, accurate pay, compliant absence and leave, flexible scheduling, and improved communications.

Our Customer Value Team is ready to support your decision-making process by working with you and your key stakeholders to develop a customized business case that you can stand behind.

Key Takeaways

- The public sector must prioritize resilient strategies to adapt to evolving workforce demographics, foster skills development, streamline operations, and navigate complex compliance and labor scheduling requirements.
- While managers today are more aligned with their employees, employers continue to fall short in implementing workplace processes and tools that adequately address their workers' needs. Workforce management technology can play a major role in providing the experiences deskless workers expect and deserve.
- WorkForce Software can meet your team's most unique rules when it comes to compliance automation, payroll, scheduling, labor forecasting, task management, time and attendance, and employee experience—thereby improving agility, reducing turnover, increasing productivity, and providing greater financial stability.
- WorkForce Software capabilities can create combined benefits of up to \$13.4 million (organizations with 5,000 employees), \$134.4 million (50,000 employees), or \$268.9 million (100,000 employees).
- Your team's decision to adopt modern workforce management can provide beneficial cross-departmental collaboration between HR, finance, operations, and IT.
